

Corporate Profile

Unifying Technology

Aspiring to be
Australia and
New Zealand's
#1 technology
service provider.

Addressing the rapid pace of change

Technology is changing, accelerating and fragmenting at a pace unparalleled in human history. This means your technology needs are increasing in size, complexity and scope, making it more difficult for you to manage.

GPK Group's mission since its inception is to become our customers trusted technology partner through providing services to support your entire technology footprint.

Because of the increasing rate of change we know you need rock solid partnerships so you can focus on what makes your business successful. GPK Group's pro-active approach has ensured that GPK customers have the right tools, at the right time to gain an edge in a competitive market place.

“We have developed a culture of continual improvement with live customer satisfaction dashboards. To compliment this, we also conduct weekly internal employee satisfaction surveys. This is critically important to GPK. If our staff are happy and fulfilled, they will serve our customers and act as part of their team more effectively.”
